PROJECTS

TechieTube Vault Project   Mar 2024– May 2024 .
TechieTube Vault conveys a sense of a secure, valuable collection of technology-related videos.

- Built a video library application using HTML, CSS, JavaScript, Bootstrap, React, and MUI, focusing on an engaging user interface.
- Developed REST API to manage video data, enabling efficient CRUD operations.
- Designed and implemented video filtering, sorting, and dynamic data display using APIs.
- Created reusable React components, utilized hooks, and implemented forms with validation.
- Used MongoDB for scalable data management and seamless backend integration.

QuickCart Application   Mar 2024 - May 2024
suggests a fast, efficient, and hassle-free shopping experience

- Developed an online shopping application using React, focusing on responsive design and seamless user experience.
- Implemented product listing, filtering, and sorting features to enhance customer navigation and satisfaction.
- Built reusable components to streamline development and ensure code efficiency.
- Managed state effectively with React hooks and integrated forms for user authentication and order processing.
- Established connections with APIs for real-time data retrieval and dynamic product display.

INTERNSHIP

Juvenilia Technology, Bhubaneswar, Odisha: Front End Developer Intern   Mar 2023 – May 2023
- Contributed as a Frontend Developer Intern in the development of the Online Fruit Ordering System project.
- Utilized HTML, CSS, JavaScript, and Bootstrap to create an intuitive and responsive user interface.
- Collaborated closely with the team to implement frontend features and enhance user experience.
- Participated in code reviews, debugging, and optimization efforts to ensure high-quality frontend deliverables.
